

MAIN RULES

1. **No offer can be higher than the previous offer** , and must be based in the following data:
 - Currency: Pesos
 - Unit VAT: Yes
 - Global VAT: No
2. No offer could have a reduction beyond 3 % of the initial price of each competitor .
3. So that you can visualize the offers of your competitors, is necessary to make your first offer.
4. If an offer is registered in the last 5 minutes from the auction, this will add another 5 additional minutes and so on until the platform do not register any offer.
5. The reduction could not be of peso in peso, the minimum reduction amount must be respected.
6. Offers delivered by other mean will not be considered.
7. Each company is responsible of their offers, thats why you must verify your offer before sending the information. In case of an error in any of the offers, it may be a reason for disqualification.

STRATEGY

1. The platform will only allow the reduction of the 3 % over the first offer, that why we suggest **do not start with inflated prices**, since otherwise it will not be possible to reach the best offer.
2. The velocity in **saving the offer** depends in many factors, thats why **it make take some seconds**, you must consider this factor while sending the offers at the last minutes.
3. All the prices of the best participants will be evaluated and if necessary **they will ask for the price card** , so it should only reduced in the conceptos that can be shown and **must update the price cards at the same time as the offers** , to have them ready when they requested them.
4. The positions of the company may vary constantly, thats why we recomend **to enter al least once a day** to evaluate the positions of the other competidors. The order shown in the graph will change every time that you login.
5. It is advisable to evaluate with anticipation the capacity to reduce the prices, it is advisable to evaluate in advance your ability to reduce prices, so that you do not have to make last minute calculations or offer unrealistic offers.
6. If the best participant does not comply with any of these points, the determination can be made **to get the next best participant** , thats why we suggest to **keep making offers even if you are not with the lower price**.

KNOWING THE ENVIRONMENT OF THE AUCTION

- The first offer must be made so that you can visualize the graph as shown in Figure 1 with the offers of the others participants.
- The red box shown in the top right at the Figure 1, is called HELP TABLE, is the indicator that shows us the **actual status of our offer**, which has the following 3 values
 - a. The indicator number 1 reflects the amount of the last offered entered.
 - b. The indicator number 2 shows our actual offer, this field will be updating at the moment that you change the price unit in the catalog and will indicate the total amount of the new offer that you will make.
 - c. The indicator number 3 shows the amount to reduce from the actual offer. This must be on zero (0.00) so that the offer can be accepted.
- To make a counteroffer you will have to modify the unit prices of each concept until the amount in the 3rd indicator is equal to zero.
- To avoid errors and maintain the competition, the platform manages 3 limits regarding the offers you can make:
 - a. Minimum reduction: Minimum difference between 2 consequential offers, for the offer to be valid you must make a reduction of at least **\$ 290,000.00**.
 - b. Limit per offer: Maximum difference between 2 consequential offers. For this auction must be **\$ 580,000.00**.
 - c. Daily offer limit, this limit is the one the participant will have to reduce his offer per day (calendar day), this time will be **\$ 6,000.00** and it is not cumulative between different days.

MAKE THE FIRST OFFER

1. Enter to the platform with the following link <https://demo.esmdigital.com.mx/>.
2. Type your user and password that was given in the welcome email.
3. In the menu, enter the option of Project Administrator.
4. Enter the Reverse Auction menu.
